

Short Sample

Welcome to this tutorial. This is a short sample to show how to use this fantastic API to do OpenCV stuff in the browser.

```
(ns composed-pine
  (:require
    [opencv3.utils :as u]
    [opencv3.core :refer :all]))
```

```
nil
```

```
(defn load-cvt-resize-show[url]
  (-> url
    (u/mat-from-url)
    (cvt-color! COLOR_RGB2GRAY)
    (resize! (new-size 150 200))
    (u/mat-view)))
```

```
#'composed-pine/load-cvt-resize-show
```
