Short Sample

Welcome to this tutorial. This is a short sample to show how to use this fantastic API to do OpenCV stuff in the browser.

```
[(ns composed-pine
    (:require
    [opencv3.utils :as u]
    [opencv3.core :refer :all]))
nil
```

```
(defn load-cvt-resize-show[url]
(-> url
  (u/mat-from-url)
  (cvt-color! COLOR_RGB2GRAY)
  (resize! (new-size 150 200))
  (u/mat-view)))

#'composed-pine/load-cvt-resize-show
```
